

Living Divani in Doha for ICONE - The Voices of Made in Italy

Living Divani consolidates its presence in the Middle East participating in the **ICONE- Voices of Design Made in Italy exhibition in Doha**, which runs from Sept. 20th to Dec. 20th, 2023.

The exhibition is an emotional experience within a design path enhanced by recent lighting, digital and sound technologies. Through immersive projections, the public is led into the journey of Made in Italy design told by the words of the most important designers.

Living Divani exhibits the **Lemni** armchair. The object, selected by **Rossana Orlandi**, collaborating with **Giulio Cappellini**, appears as an intimate and chic observatory on the world that tells the desire to free itself from unnecessary weights and hover in the air, enchanting with its graphic vitality. Designed by **Marco Lavit**, it consists of a tubular base that originates from the symbol of infinity, then folded on itself to create support for the body.

During the guided tour, the selected armchair is highlighted with a play of lights telling itself through the voice of the designer. After the project description, you can access a second room dedicated to the participating brands' stories.

Living Divani takes part in precious partnership, merging the excellence and uniqueness of design with an event focused on the trademark of **Made in Italy**.
